Effective September 2026

How To Measure Quickly & Accurately

Inside Mount

Outside Mount

Inside Mount (IM) Installation

❶ Measure Width

Measure to the nearest ⅛" between inside surfaces of window frame; at the top, middle, and bottom.

Record the narrowest width of the three.

❷ Measure Height

Measure to the nearest ⅛" from inside surface at top of window to top of sill; at the left, middle, and right.

Record the tallest height of the three.

❸ Measure Depth

Measure exact depth of window casing making note of any obstacles, i.e. handles, tracks, or cranks that could interfere with the blind or shade function.

Use the shortest depth.

Outside Mount (OM) Installation

❶ Measure Width

Measure to the nearest ⅛" between outermost points where shade is to be placed.

Measurement should overlap each side of window frame by at least 1½".

❷ Measure Height

Measure to the nearest ⅛" from where top of shade will be located to top of sill, or measure to point of shade reach if no sill.

NOTE: Take all measurements to the nearest ⅛". DO NOT take any deductions. The factory will make the necessary adjustments to help ensure your window covering operates smoothly.

Visit www.LEVOLOR.com/how-to-measure for more measuring information

Helpful Hints

Always use a metal tape measure as cloth may stretch.

Measure your window - not your existing blind or shade.

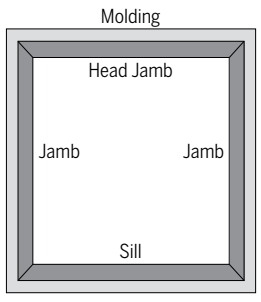

Measure each window separately even if they appear to be identical.

Check depth to ensure shade will clear any obstacles and can accommodate headrail if flush mount is desired.

If you prefer shade not to touch sill, deduct ¼".

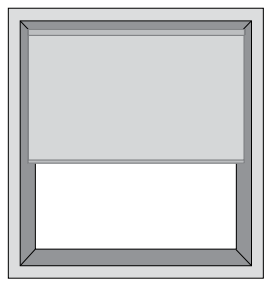

If there is no sill, measure height to point where shade is to reach.

Window & Measuring Terminology

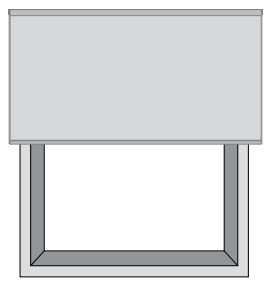

Window Components Terminology

- Collectively, the sill and jambs are called the “window casement” or "frame."

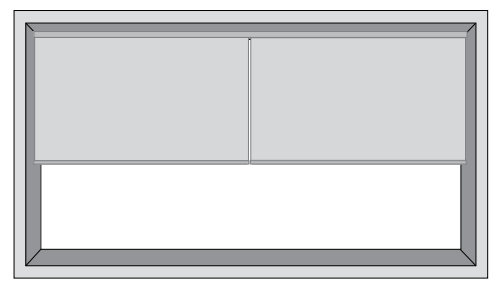

Inside Mount

- Shade fits within window opening.
- Great for windows with beautiful trim.

Outside Mount

- Shade mounts outside window opening.
- Increased light control and privacy.

2-on-1 Headrail

- Provides the clean appearance of a single shade with the ability to operate each shade independently.
- Can be mounted inside or outside.

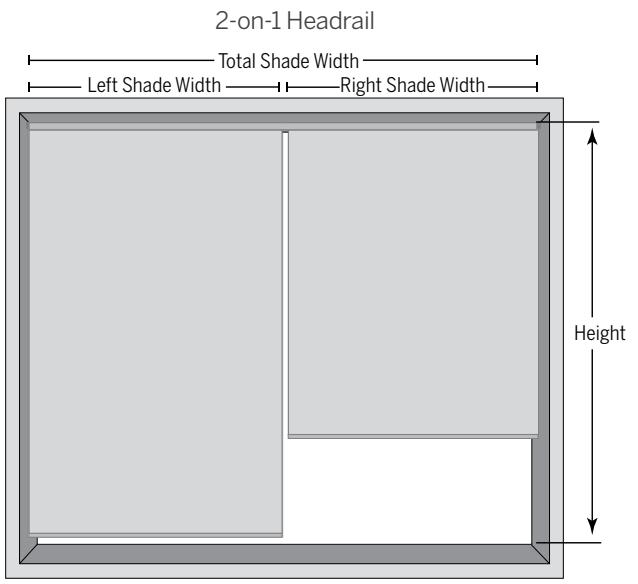

Side Mount–Not Illustrated

- Used primarily when conventional mounting will not work—for example, in an arched window opening.

For additional information visit LEVOLOR.com

How to Measure Two Shades on One Headrail (2-on-1 Headrail)

Inside Mount (IM) Installation

❶ Measure Width

Total Shade Width — Measure to the nearest ⅛" between inside surfaces of window frame; at the top, middle, and bottom.

Record the narrowest width of the three.

Left Shade Width — Measure the width that you want the left shade to cover.

Order this shade first when placing your order.

Right Shade Width — Measure the width that you want the right shade to cover.

❷ Measure Height

Overall Shade Height — Measure to the nearest ⅛" from inside surface at top of window to top of sill; at the left, middle, and right.

Record the tallest height of the three.

❸ Measure Depth

Measure exact depth of window casing making note of any obstacles, i.e. handles, tracks, or cranks, that could interfere with the blind or shade function.

Use the shortest depth.

Outside Mount (OM) Installation

❶ Measure Width

Overall Shade Width — Measure to the nearest ⅛" between outermost points where shade is to be placed.

Add an additional 3" to 6" to total width for maximum privacy.

Left Shade Width — Measure the width that you want the left shade to cover.

Order this shade first when placing your order.

Right Shade Width — Measure the width that you want the right shade to cover.

❷ Measure Height

Overall Shade Height — Measure to the nearest ⅛" from where top of shade will be located to top of sill or, measure to point of shade reach if no sill.

2-ON-1 HELPFUL NOTES:

- Each shade operates individually.
- There will be a gap between the fabric on the left and right shades to operate independently.
- Light gap is ½" — (Light Gap is the space needed between the 2 shades to ensure proper operation.)
- Left shade controls are on the left side and the right shade controls on the right.
- Always use a metal tape measure as cloth may stretch.
- Take all measurements to the nearest ⅛". DO NOT take any deductions.
- The factory will make the necessary adjustments to help ensure your shade operates smoothly.

Motorization Overview

LEVOLOR® InMotion™

Experience motorization like never before with smart home integration and automated scheduling.
Take full control of your shades using voice command, the intuitive app, or remote.

Remote
Requires 2 x AAA batteries, included.

Hub
Requires 5V 2A adapter, included.
Connect up to 30 shades per hub.

App
Phone sold separately

App Requirements:
- LEVOLOR Hub
- 2.4 GHz Wi-Fi Network
- Apple® iOS10.0 or newer
- Android™ 4.1 or newer

Works With:
- Amazon Alexa
- Google Home
- IFTTT
- Samsung SmartThings
- Siri

- Upgrade to motorization to control shades with remote or app.
- Powered by an integrated, rechargable lithium-ion battery.
- Recharge with included magnetic micro-USB charger.
- Control shades with the 15-channel remote (sold separately).
- Add the hub (sold separately) to sync with your Wi-Fi to enable app control and smart home integration.
- Organize shades by room.
- See real-time shade position and battery charge status.
- Store preset shade positions as scenes.
- Create routines by scheduling scenes by day of week and time of day, even proximity to sunrise or sunset.
- Adjust shades when you are away from home.
- App available to download for iOS and Android devices.
- Available on bottom-up shades only.

Visit LEVOLOR.com/InMotion for additional information.

NOTE: LEVOLOR® InMotion™ is not compatible with products from the previous LEVOLOR® motorization program.
This includes blinds/shades that are controlled with the previous LEVOLOR app, 3-channel remote, and 6-channel remote.

For additional information visit LEVOLOR.com

InMotion™ Accessories Overview

LEVOLOR® InMotion™ Wall Switch

The InMotion Wall Remote lets you achieve effortless light control with the touch of a button, mounted to a wall to avoid misplacement. A great solution for hard to reach windows or in grand rooms with various automated solutions.

- Integrates with the LEVOLOR InMotion App or simply works by itself
- Operates an unlimited number of LEVOLOR motorized window coverings
- Features a clean, modern design with easy to use controls
- Activate group control and favorite position with a touch of a button
- Control up to 15-channels from one remote
- Hide unused channels for faster channel selection and scrolling
- Locking feature to prevent accidental programming changes
- No need to cut in to wall with the wireless design
- Wall Switch available on bottom up shades only
- Dimensions: 3.4" L x 3.4" W x 0.7" D

LEVOLOR® InMotion™ Solar Panel

Harness the power of solar energy to power your motorized blinds and shades, ensuring reliable and efficient performance. A great choice for hard to reach windows.

- One Solar Panel per shade or blind is needed
- Easy to install and the low profile design is easy to conceal
- Provides a continuous charge to internal rechargeable batteries
- Syncs with the LEVOLOR InMotion™ App to show battery level
- Not recommended on north facing windows
- Micro USB charging cable, 59" long (included)
- Can be added to any existing InMotion™ blind or shade
- Dimensions: 18.7" L x 2" W x .30" D

For additional product information visit LEVOLOR.com/inmotionsupport

Roman Shades

Shade Style

Refers to the shade appearance when completely lowered.

Flat Fold

- Neatly pleated fabric for a contemporary look.

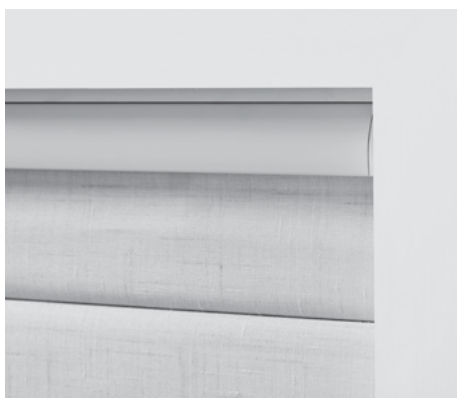

Soft Fold

- Relaxed pleat allows fabric to softly cascade down.

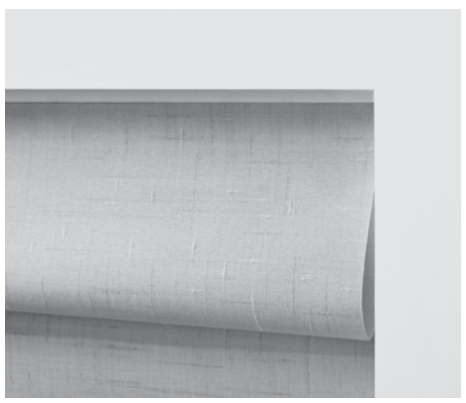

Valance Style

Integrated

- Modern design; color coordinates with the shade fabric.

Classic

- Traditional, matching fabric valance.

Lift Control

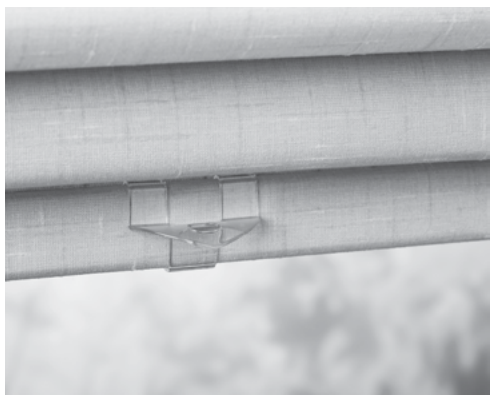

Cord Loop

- Perfect for large windows.
- Eliminates dangling cords.
- Cords remain the same length regardless of shade position.

NOTE: Shown with cellular shade.

Cordless

- Offers a clean, finished profile across all your windows without dangling cords.
- Bottom rail handle included for operation.

NOTE: Extension pole can be purchased separately to raise and lower shades that are hard to reach.

Motorized

- Control shade using voice commands, app or remote.

Roman Shades

Lift Styles

Bottom-Up

- Standard operation; shade raises and lowers from the bottom.

Top-Down/Bottom-Up

- The shade can be lowered from the top and raised from the bottom.
- The shade is measured the same way as a standard shade.
- Available in Cordless.

  Not available with 2-on-1 headrail.

Pattern Fabrics

Shades made from the patterned collections may differ slightly in the location of the pattern from shade to shade. This is due to the location in the roll from which the fabric is cut for the shade.

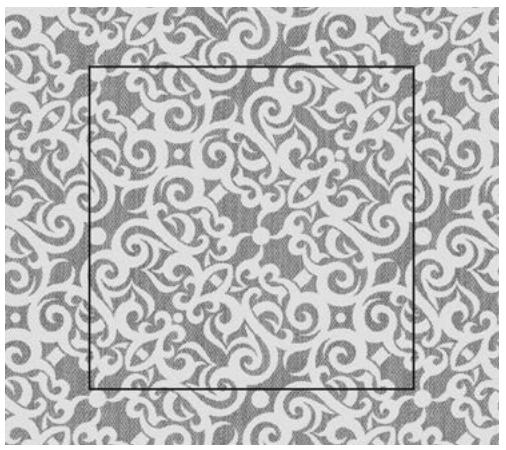

Divine

Approximate repeat size: 12.6" x 12.6"

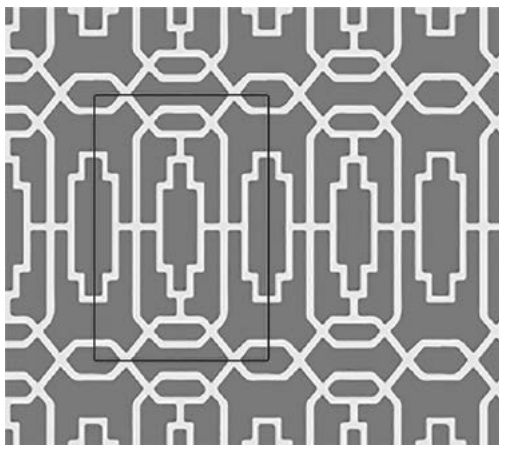

Valour

Approximate repeat size: 8.4" x 8.4"

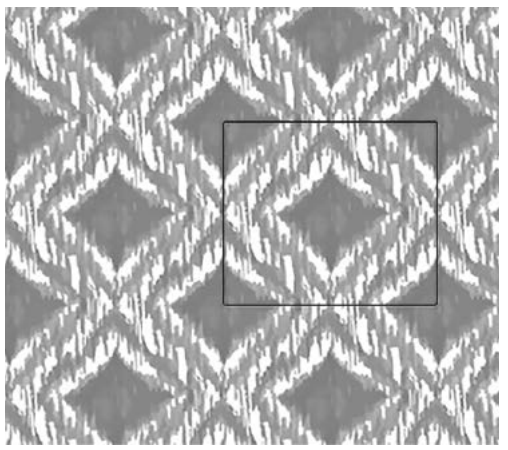

Waltz

Approximate repeat size: 3.4" x 5.2"

Fantasia

Approximate repeat size: 4.2" x 3.9"

For additional information visit LEVOLOR.com

Roman Shades Product Specifications & Critical Dimensions

Use technical information listed below to assist in product selection.

OPERATING SYSTEM & SHADE FUNCTION COMBINATIONS

Shade Type	Shade Function	Operating System		
		Cord Loop	Cordless	Motorized
Single Shade	Bottom-Up	✓	✓	✓
	Top-Down/Bottom-Up	N/A	✓	N/A
2-on-1	Bottom-Up	✓	✓	N/A
	Top-Down/Bottom-Up	N/A	✓	N/A

HEADRAIL & BOTTOM RAIL DIMENSIONS

NOTE: Reference Minimum Depth Requirements chart for required depths needed for proper installation.

Operating System	Headrail Dimensions		Bottom Rail Dimensions	
	Depth	Height	Depth	Height
Cord Loop	1 3/4"	1 3/8"	3/4"	1 1/4"
Cordless Bottom-Up	1 3/4"	1 3/8"		
Cordless Top-Down /Bottom-Up	1 3/4"	1 3/8"		
Motorized	2 1/16"	1 3/8"		

INSTALLATION BRACKETS

Your order will include the correct number of installation brackets for your shade width, as shown in the table below.

	Number of Brackets
Shade Width	All Operating Systems
up to 38"	2
> 38" - 68"	3
> 68" - 82"	4
> 82" - 106"	5
> 106" - 130"	6
> 130"	7

STANDARD FACTORY DEDUCTIONS

DO NOT make any deductions to your measurements.

	Inside Mount	Outside Mount
Cord Loop	3/8"	0"
Cordless Bottom-Up	3/8"	0"
Cordless Top-Down/Bottom-Up	3/8"	0"
Motorization	3/8"	0"

LIGHT GAPS (Fabric width is narrower than the finished shade)

	Light Gaps Per Side	
Operating System	Inside Mount	Outside Mount
All Operating Systems	1/4"	0"

CORD LOOP CORD LENGTHS

Minimum Shade Length	Maximum Shade Length	Length
18"	33"	1'
> 33"	48"	2'
> 48"	60"	3'
> 60"	72"	4'
> 72"	90"	6'

Custom cord loop lengths can be requested at time of order and are available in 12", 24", 36", 48", 72", and 96".

LIFT CONTROL OPERATION & OPTIONS

Shade Type	Shade Function	Operating System		
		Cord Loop	Cordless	Motorized
Single Shade	Bottom-Up	Left or right control; left is standard	Handle operates shade	Right control only
	Top-Down/Bottom-Up	N/A	Handle operates shade	N/A
2-on-1	Bottom-Up	Left control operates left shade; right control operates right shade	Handle operates shade	N/A
	Top-Down/Bottom-Up	N/A	Handle operates shade	N/A

Roman Shades Color Coordination Guide

Coordinating hardware colors are pre-selected based on fabric color. The color samples below represent headrail, bottom rail, end cap, and tassel colors.
The Fabric Index charts match each fabric to a hardware component based on color coordination.

NOTE: The actual color of the hardware may vary from the samples in the color coordination guide.

Color lot variations may occur with fabric and/or hardware due to the process of color application. For the best color match, order all shades for a room at the same time. Pattern availability and color lot matching between orders cannot be assured.

LEVOLOR

Roman Shades Cleaning & Care

Care Instructions

A brush-type vacuum attachment or feather duster should be used for cleaning. If your shade should become stained, you may clean it by dabbing the spot with a sponge dampened with lukewarm water. Avoid contact with window cleaning products as these may discolor your shade. Ultrasonic cleaning is not recommended or covered by our warranty.

Color Variation

Color lot variations may occur due to the process of color application. For the best color match, order all shades for a room at the same time. Pattern availability and color lot matching between orders cannot be assured. Any variation in color is in accordance with industry standards. There may be slight differences between light filtering and room darkening colors.

NOTE: Improper cleaning may void warranty.

Dusting

Use a feather duster for regular cleaning.

Vacuuming

Use a low-suction vacuum with a brush-type cleaner attachment; stroke lightly over the shade to clean.

Forced Air

Blow away dirt and debris using clean, compressed air.

Spot-Cleaning/Stain Removal at Home

Use warm water and a mild soap, like Woolite® or Scotchgard®, if needed.

Professional Injection/Extraction Cleaning

Call local on-site blind/shade cleaner that injects a cleaning solution into the fabric and extracts the dirty solution at the same time. The service is typically performed at home so you do not need to remove your window treatments.

- Order Processing
- Claims and Returns
- Warranty

LEVOLOR

Natural Shades

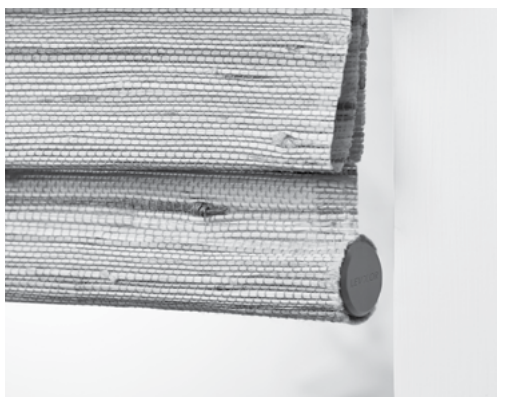

Lift Control

Cord Loop

- Perfect for large windows.
- Eliminates dangling cords.
- Cords remain the same length regardless of shade position.

Cordless

- Offers a clean, finished profile across all your windows without dangling cords.

Motorized

- Control shade using voice commands, app, or remote

Lift Style

Bottom-Up

- Standard operation; shade raises and lowers from the bottom.

For additional information visit LEVOLOR.com

Natural Shades

Valance Style

None

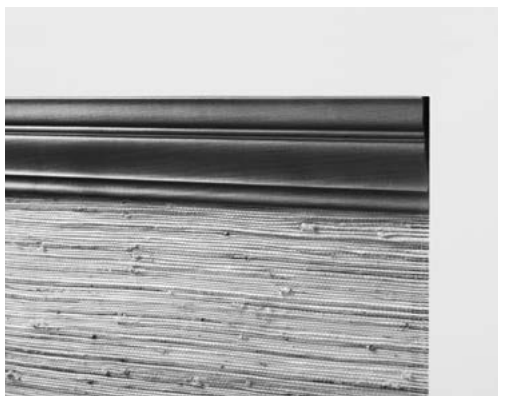

- Provides a clean look. Fabric is one panel and begins at the top of the window.
- Available on Cordless and Cord Loop shades.

Classic

- Traditional, matching fabric valance.
- Available on single and multiple shades per headrail and on all Motorized, Cordless, and Cord Loop shades.
- Valance return sizes cannot be customized.

Wood

- Decorative wood to coordinate with window trim.
- Available on single and multiple shades per headrail and on all Motorized, Cordless, and Cord Loop shades.

Edge Binding

Edge Binding adds a decorative, colored fabric accent to the shade for a more finished look. It is recommended to use 1" Edge Binding for window widths less than 36" and 2" Edge Binding for window widths greater than 36". Edge Binding available in Black, White, Almond, Camel, Cocoa, Copper, Gris, and Khaki.

NOTE: Only available if shade width is greater than 16".

For Cordless shades, Edge Binding will only be applied down the sides of the shade and Classic Valance (if selected).

No Bottom Bar or Hold-Down Brackets available.

1 inch – Ideal for smaller windows

2 inch – Ideal for larger windows

Natural Shades Color Coordination Guide

Coordinating light control liners and component colors are pre-selected based on fabric color.
All liners are neutral to the street, and the liner color will be facing to the fabric.

Liners

Wood Finish

Bead Chain

NOTE: The actual color of the hardware may vary from the samples in the color coordination guide.

Color lot variations may occur with fabric and/or hardware due to the process of color application. For the best color match, order all shades for a room at the same time. Pattern availability and color lot matching between orders cannot be assured.

Natural Shades Cleaning & Care

Care Instructions

Periodically vacuum with a brush attachment to ensure lasting beauty. With proper care and maintenance, Natural Shades should last for years. Do not use water, solvents, or abrasive solutions to clean the shade.

Color Variation

LEVOLOR Natural Shades are created using natural products. By nature, no two strands of grass, bamboo, or reeds are exactly the same, making every shade truly unique. Slight color, grain, and texture variations should be expected and cherished for their unique beauty.

Stretching and Shrinking

Natural woven fabric will be affected by temperature and humidity. Shipping and handling may cause a slight change in shade lengths and slight shrinkage, stretching, and warping may occur over time.

NOTE: Material stretching may be more noticeable on inside mounts.
Improper cleaning may void warranty.

Dusting

Use a feather duster for regular cleaning.

Vacuuming

Use a low-suction vacuum with a brush-type cleaner attachment; stroke lightly over the shade to clean.

Forced Air

Blow away dirt and debris using clean, compressed air.
