

Inside Mount: for a beautifully framed look

1. Measure Width

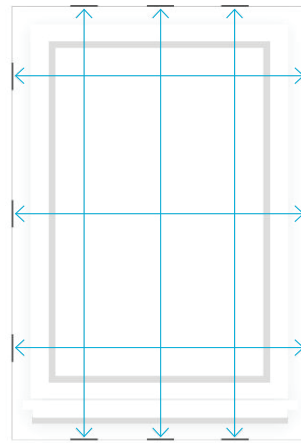

Measure to the nearest 1/8" between inside surfaces of window frame: at the top, middle, and bottom.

Record the narrowest width of the three.

2. Measure Height

Measure to the nearest 1/8" between inside surfaces to top of sill: at the left, middle, and right.

Record the tallest height of the three.

Outside Mount: for increased light control and privacy

1. Measure Width

Measure to the nearest 1/8" between outermost points where shade is to be placed. Measurement should overlap each side of window frame by at least 1 1/2".

Record the narrowest width of the three.

2. Measure Height

Measure to the nearest 1/8" from where the top of shade will be located to the top of sill, or measure to point of shade reach if no sill.

Record the tallest height of the three.
